## Contents

reface	ix
troduction	xiii
art 1. The Basics of SMALLTALK Programming	1
hapter 1. A Brief Tour of SQUEAK	3
1.1. The first contact	6
hapter 2. The First Program	17
2.3. Program test	17 22 31 36 39 45 46 54
hapter 3. Architecture and Inheritance	59
3.1. SMALLTALK software architecture	
hapter 4. Some Elements of SQUEAK Syntax and Grammar	67
	67 67

4.1.2. Pseudo-variables true and false	68
4.1.3. Pseudo-variables self and super	72
4.1.4. Pseudo-variable thisContext	72
4.2. Comments and identifiers	73
4.2.1. Comments	73
4.2.2. Identifiers	74
4.3. Literals	75
4.3.1. Numbers	75
4.3.2. Characters	79
4.3.3. Strings	81
4.3.4. Symbols	86
4.3.5. Arrays	88
4.3.6. Exercises	101
4.4. Variables	105
4.4.1. Temporary variables	107
	108
	109
4.4.4. Named instance variables	112
4.4.5. Indexed instance variables	114
4.4.6. Global variables	116
4.4.7. Class variables	119
4.4.8. Pool variables	122
4.4.9. Exercises	128
4.5. Messages	131
4.5.1. Unary messages	131
4.5.2. Binary messages	
	134
	137
4.5.5. Expression sequences	140
4.5.6. Cascaded messages	141
4.5.7. Primitives	142
4.6. Control structure	146
4.6.1. Conditional control structures	146
4.6.2. Recursive control structures	150
4.6.3. Iterative control structures	155
4.7. Exception handling	175
4.7.1. Exceptions handling messages of the Object class	176
4.7.2. Exception handling messages for blocks	
4.7.3. Messages understood by exceptions	
4.7.4. Multiple exceptions	188
4.7.5. Define its own exceptions	192
4.8. Exercises	194

Part 2. Programming in SQUEAK	201
Chapter 5. Drawings Like in Logo	203
5.1. The Pen class	204
	212
6	221
8-1-8-1-8-1	226
5.5. A user interface for Logo drawings	237
5.6. Lindenmayer systems	
5.6.1. A first interpreter of Lindenmayer systems	239
5.6.2. Multiple activations of the same L-system	
5.6.3. Computing the step size and the initial position	
5.6.4. Bracketed Lindenmayer systems	
5.6.5. Read a L-system from a file	
5.6.6. Exercises	266
Chapter 6. The Dependency Mechanism	271
6.1. Basics of the dependency mechanism	272
6.1.1. Adding and removing dependencies	
	273
•	
6.1.4. A second use case of dependencies	
6.2. Programming a calculator	291
6.2.1. The keys	
6.2.3. Development of a graphical user interface	
6.2.4. Construction of the interface between views and models	
	315
6.3. Exercises	321
6.4. A KCalc calculator	
6.5. Exercises	336
6.6. Concluding remarks	337
Part 3. Appendices	339
Appendix 1	341
A1.1. Exercises from section 1.3	341
A1.2. Exercises from section 2.6	347
A1.3. Exercises for section 2.8	351
A1.4. Exercises from section 4.3.6	359
A1.5. Exercises for section 4.4.9	

A1.6. Exercises from section 4.8	39(
A1.7. Exercises for section 5.3	107
A1.8. Exercises for section 5.6.6	123
A1.9. Exercises for section 6.3	159
A1.10. Exercises for section 6.5	186
Appendix 2	501
Appendix 3	505
Appendix 4	507
Bibliography	515
ndev	<b>5</b> 21
